

# Directory of Renewable Energy Actors Tanzania

18.09.2020

A project funded by

BMZ

Federal Ministry  
for Economic Cooperation  
and Development

via

sequa gmbH  
Partner of German Business

implemented by

Berufliche Fortbildungszentren  
der Bayerischen Wirtschaft (BFZ)  
gemeinnützige GmbH

## A Word from TAREA Deputy Executive Secretary

*Dear Esteemed Renewable energy stakeholders and friends of mother nature; TAREA brings you a long awaited Renewable energy actors' Directory for Tanzania and the globe at large that has been for long one of the informative tools when it comes to decisions related to Renewable energy technology.*

*Renewable energy has gained popularity of recent years to a large part of the country and the market is experiencing a shift in demand for small pico solar to solar home systems and now more to mini-grids that are spread all over Tanzania mainland.*

*It is with this increased awareness from policy, decision makers to the end user in the off grid area, TAREA is also happy that the sector's contribution to Tanzania Country electricity connectivity has increased to a total of 66.7% of households in Tanzania whereas households connected by solar contributed to 30.4% while the national grid stands at 36.3%. TAREA is glad that this it is now out and are honoured to bring you a publication that enables you to source a reliable service provider to the best of its knowledge.*

*This third edition of stakeholder's directory is brought to you as an important booklet when it comes to decision making, as TAREA has compiled all recommended actors that one might need to facilitate planning decision from household level to a mini-grid assembly. Moreover this issue has incorporated Technicians from different regions, consultants both individual as well as business companies that work and or trade in the country with different renewable energy technologies.*

*TAREA for the past 20 years of existence has grown its membership base to more than 832 members and more than 1500 stakeholders who are reached by emails on a single mail out. TAREA aspires at expanding its wings to zones and regions where it does not have local presence by informing decision makers of reliable service providers and attracting actors to join so that challenges and bottlenecks are addressed together with a single voice.*

*TAREA is grateful to all stakeholders that made this issue possible to achieve and further invites new stakeholders locally and internationally to continue the initiative of making Tanzania a greener and sustainable economy for now and the foreseen future. TAREA network envision the opportunity to ensure productive use of Electricity of Renewable energy service for a greener economy and best quality of both service and products in Tanzania.*

*Publishing of this issue of directory has been made possible through the support of Federal Ministry of Economic Cooperation and Development (BMZ) and SEQUA through bfz gGmbH for which we are highly indebted.*

**God bless Tanzania**

A handwritten signature in blue ink, reading "Laswai".

**Ms. Emma Laswai**  
**Deputy Executive Secretary**
